

# Young Olive Plants

## Lewis Horticulture-your international supplier for commercial olive varieties for your next olive project

- DNA certified mother stock
- Key commercial olive varieties
- High Health production procedures
- Plants produced to order to meet your country quarantine requirements
- Competitive pricing
- Customer backup and support. Contract consultancy and project management available
- Ability to supply plants year round

## Why source olive plants from Australia?

- Production from high health DNA tested mother stock
- Australia is free from the major pests and diseases affecting olive groves elsewhere in the world
- Cuttings harvested from true to type, fruiting trees ensuring early to commence production
- High light and true Mediterranean growing conditions ensure your plants get the best possible start
- All shipments supplied with a Phytosanitary declaration and inspected by Australian Quarantine Inspection service

# Young Olive Plants

## Olive varieties for oil production

Variety	Features	Maturity
Frantoio	High quality oil from this variety grown extensively in Tuscany-Italy	Mid season
Leccino	Cold hardy variety producing good quality oil. Widely grown in colder regions of Tuscany. Pollinator for Frantoio	Early to mid season
Pendolino	Good quality oil producer and widely used as a pollinator	Mid to late season
Koreneiki	High quality oil variety suited to hot growing areas. Used as a pollinator for Barnea.	Late season
Picholine	High quality oil variety used extensively in France. Used as a pollinator for Barnea	Mid season
Arbequina	Mild oil producer widely planted in Spain. Begins cropping early. Also able to be used in more intensive plantings	Early to mid season
Arbequina I-18	More upright selection of Arbequina	Early to mid season
Arbosana	Mild oil producer widely planted in Spain. Used for blending to improve shelf life in Arbequina oil. Able to be used in more intensive plantings.	Mid season
I-77	Good quality oil variety suited to more intensive plantings	Mid season
Picual	Produces good quality oil and widely used for blending especially with Arbequina to extend shelf life.	Mid season
Coratina	Produces good quality oil and is cold and heat hardy.	Mid to late season
Barnea	A variety widely planted in Australia and is suited to hot dry regions for best production. High vigour variety.	Mid season
Corregiola	High quality oil. This is a selection from Frantoio with greater cold tolerance and earlier to commence production.	Mid season

# Young Olive Plants

## Olive varieties for table fruit production

Young Olive plants produced in sterile oasis media allowing ease of handling and rapid on potting.

Variety	Features	Maturity
